

## Installation instructions

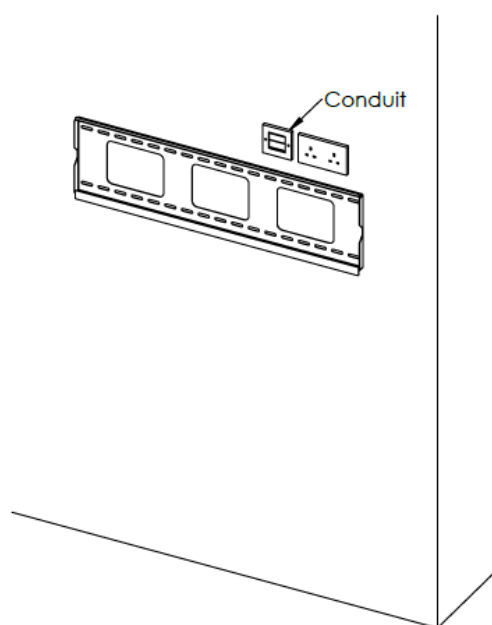

Your Mirror TV has already been part assembled in our manufacturing facilities.

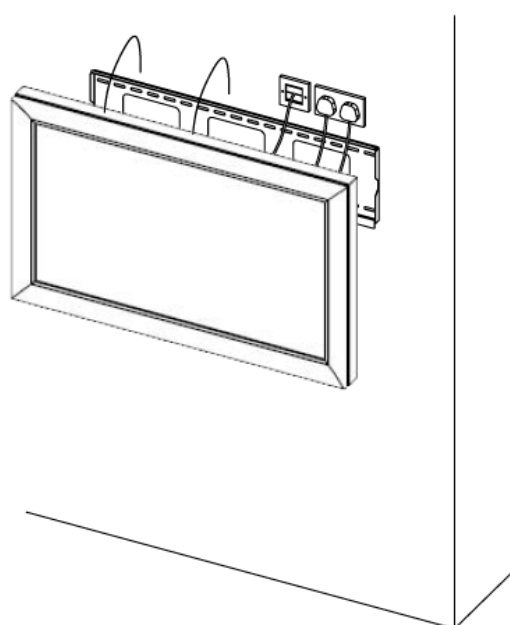

You will find that the frame and bracket has already been attached to the TV and the IR kit that allows you to use your remote control has been attached to the TV. If the IR has not been attached refer to the IR instructions to attach the IR to the TV

1. Install the wall part of the bracket that comes with your TV to the wall using the screws that came with your Mirror TV or suitable screws and bolts for the wall the Mirror TV is installed on.
2. Plug in the TV
3. Plug in the IR kit using the supplied 5V plug. Warning: Do not plug in the IR kit into the USB socket of the TV. Always plug the IR kit into a wall socket or an external USB socket. This will allow the IR to always work, even when the TV does not have enough power.
4. Hook the TV with the TV claws onto the TV Frame and enjoy your new TV Mirror.

Cleaning should be done with a microfiber cloth and water.  
For any questions please get in touch on 02089545213 or at [enquiries@frameyourtv.co.uk](mailto:enquiries@frameyourtv.co.uk)

**Step 1:** Attach wall mount bracket frame

**Step 2:** Plug in TV and IR extender Mount the TV frame to the wall bracket.
